6.170 TA Meeting #3 Agenda

Agenda
- Feedback on how faculty, student user roles are handled in code
- Feedback on MVP
  - Pageflow
  - Visual layout
  - Demo
- Feedback on our critique of Curry

Progress report
- Working on updating design doc
- Work in progress (to be assigned)
  - Review system
  - Add resume uploading(Deborah)
  - Auto-populating professors' profiles
  - Testing (Dwyane)
  - Clean up UI (Dwyane)

Minutes

- Feedback on user rules
  - Instead of pointing to controller method, just render the view
  - "render show_student"
  - Use "kindOf" method instead of "type==Student" to check roles
- Design doc feedback
  - Coming from TA's this Saturday
- Other ideas
  - Consider importing profiles from LinkedIn
  - Make a demo account (put it in ReadMe)
- MVP feedback
  - Apply now: Consider using a modal instead of re-direct to new page
    - Have info about UROP in header, nicer to stay on the page, so they can apply and continue scrolling
    - Emphasize this 'Apply now" link more, have positive actions stand out more (e.g. like Pinterest)
  - Styling
  - Notices show up twice
  - Make sure to link to profiles
  - Scaffolding
    - Get rid of any actions that aren't being used
  - Profiles

- ■ Add more info and styling
- ■ Have some dashboard for yourself, which shows reviews, and previous applications
  - ● Set up two controllers for users
    - ○ One for login (that apply for students, supervisors)
    - ○ But for separate logic, have student, supervisor controller, more readable
- ● Critique of Curry
  - ○ Good to mention more of their design doc, e.g. ideas for design, key concepts, what could have been done differently
  - ○ Mention design challenges other team may not have listed
  - ○ There's a lot of text now - avoid it
    - ■ If you're using google, just put commentary in another doc
